#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 01 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 24 September 2003.
- 2a) ☐ This action is **FINAL**.                      2b) ☐ This action is non-final.

***DETAILED ACTION***

1. Claims 1-88 were presented for examination.

***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

**I.** Claims 1-19, 37-66, and 86-88, are drawn to authentication using digital signature, classified in class 713, subclass 176.

**II.** Claims 20-36, 67-82, are drawn to particular communication authentication technique, classified in class 713, subclass 168.

**III.** Claims 83-85, are drawn to particular network access control and authentication protocol, classified in class 726, subclass 2.

3. The inventions are distinct, each from the other because:

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention I has separate utility as authentication using digital signature which is different from invention II. Invention II discloses particular communication authentication technique such as secure email communication technique which can be used to implement other protocols different than the one set forth by invention I.

In the instant case, invention I has separate utility as authentication using digital signature which is different from invention III. Invention III discloses a particular network access control

and authentication protocol with minimal use of cryptography which can be used to implement other protocols different than the one set forth by invention I.

4. The search required for each invention is different and not co-extensive for examination purpose. Specifically, for each of above inventions, the search would require the search of different PTO's classification class and subclass, and subject matter.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. See MPEP § 806.05(d).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### ***Conclusion***

7. A shortened statutory period for reply is set to expire THIRTY DAYS from the mailing date of this communication. Failure to respond within the period of response will cause the application to become abandoned (35 U.S.C. Sect 133). Extensions of time may be obtained under the provision of 37 CFR 1.136(A).
